

# Aerial Imagery

ProAg  
croplogic

## Powerfully simple Actionable imagery

We understand the importance knowing your crops' health. CropLogic™ Aerial Imagery is designed to help you proactively know where you are needed the most on your farm

### MONITOR CROP PERFORMANCE

Gain a bird's-eye view of your crops' health with high-resolution digital infrared, vegetative index and normal color imagery

### 30+ YEARS OF RESEARCH

Powerful and proven tool developed by leading aerial imagery specialists leveraging over 30 years of research

### 24-HOUR TURNAROUND

Receive mobile text notifications when your images are ready to view - helping you make those critical decisions, fast

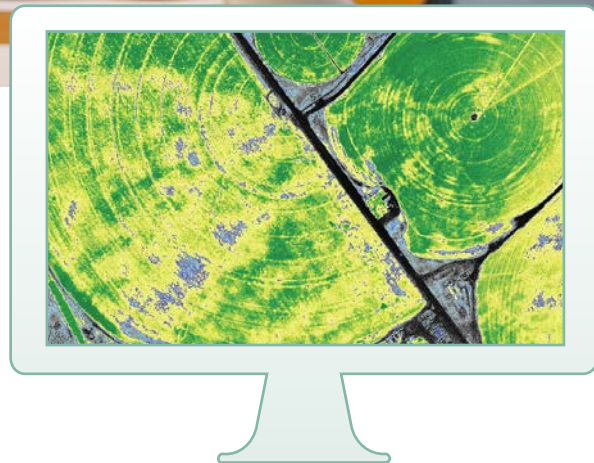

### TRUSTED LOCAL EXPERIENCE

Our agronomists have over 100 years combined experience working locally with farmers to help optimize crop performance

## CropLogic™ Aerial Imagery

A powerful solution for early detection and intervention of problem areas on your farm, providing you with actionable in-field imagery designed to help minimize threats to your crops' performance

- ✓ Gain insights into your crops' health with high-resolution infrared and vegetative index imagery
- ✓ Performance-enhancing irrigation and agronomic decisions at the click of a button
- ✓ Predict crop behavioral trends with chronological image display dashboard
- ✓ Effectively coordinate your farm activities with imagery 24-hour turnaround
- ✓ Reliable and periodic image capture scheduling
- ✓ After-sale hands-on services provided by local and experienced agronomists

A proven tool, tried and tested with real farmers across a variety of crops including row crops, viticulture and orchard

### CropLogic™ Aerial Imagery Your Crops' Doctor

Better monitor, track and optimize your irrigation, disease and pest management activities with high-resolution digital imagery displaying a bird's-eye view of the state of your crops' health. Access your farm's infrared, vegetative index and normal color imagery all-in-the-one place with the easy-to-navigate dashboard, helping you make cost-saving decisions throughout those critical season periods.

### CropLogic™ realTime GrowerView Desktop Dashboard & Android/iOS App

We also offer realTime GrowerView - a hardware and software solution designed by agronomists leveraging over 30 years' of research. Access your soil moisture data all in one place, and on-the-go, with the simple-to-use app and desktop dashboard, designed to help you optimise your crops' performance.
